

Supports 30,000 Appliances / Japan Safety Compliant

Instruction Manual Creation System

AIS

- ✓ **No Expertise Needed!** Create Professional Manuals Easily!
- ✓ **Finish Manuals in Just 30 Minutes—Save Time & Effort!**
- ✓ **Auto generates legal and safety notices** for each product category.
No omissions or mistakes.
- ✓ **Cloud-based data checks, proofreading, and delivery.**
Reduce development costs.

Patent No. P7595380

Solve Home Appliance Manufacturers' Challenges Instantly with **AIS!**

AIS Instruction Manual Creation System Solves Home Appliance Manufacturers' Challenges!

Are you struggling with these issues?

Case 1: The verification process to meet the legal requirements for instruction manuals is complicated.

Legal requirements for instruction manuals vary depending on each product. Moreover, these legal factors are issued by different government ministries, making the verification process time-consuming and highly complex. As a result, traditionally, the confirmation and investigation have taken excessive time and required specialized knowledge. In addition, because humans are involved, there is a risk of human error and inconsistencies, leading to issues such as missing legal statements.

Solution ! !

With AIS, no specialized knowledge is needed. We have digitized Japan's legal requirements—including the PL Law, Electrical Safety Law, Household Goods Quality Labeling Law, Act against Unjustifiable Premiums and Misleading Representations, Pharmaceutical Affairs Law, Recycling Law, Measurement Act, and Fluorocarbon Emission Control Law—into a database, allowing automatic creation of instruction manuals.

Case 2: Creating consumer warnings and safety notices tailored to each product's specific characteristics is challenging.

For example, even products of the same type, such as coffee makers, have different characteristics like materials and structure. Therefore, traditionally, creating consumer warnings and safety notices required thorough attention with no room for oversight, relying on extensive experience and multiple layers of checks.

Solution ! !

With AIS, no experience is needed, and you can create warnings instantly. Simply select the product type, functions, materials, and characteristics, and AIS will automatically generate tailored warnings and safety notices, placing them in the appropriate sections of the instruction manual. Moreover, AIS supports over 30,000 combinations of home appliance variations.

Case 3: Outsourcing costs are a heavy burden.

Although external designers are hired to create instruction manual layouts, they are primarily design specialists and often lack legal and product knowledge. As a result, considerable time is spent coordinating with designers, and design fees are incurred for each product, leading to significant time and cost burdens over the course of a year.

Solution ! !

AIS features an easy-to-use interface that allows anyone to create instruction manuals effortlessly. In as little as 30 minutes, anyone can produce manuals of consistent quality. Additionally, AIS maintains the same cost regardless of the number of instruction manuals created.

Case 4: Traditional methods make business improvement difficult.

Many companies use dedicated design software to create instruction manual layouts. However, most of these design tools are not cloud-based, which means that proofreading requires printing out the manuals. Additionally, proofreading often involves handwritten notes on printed materials, making it difficult to perform reviews remotely or while on the go.

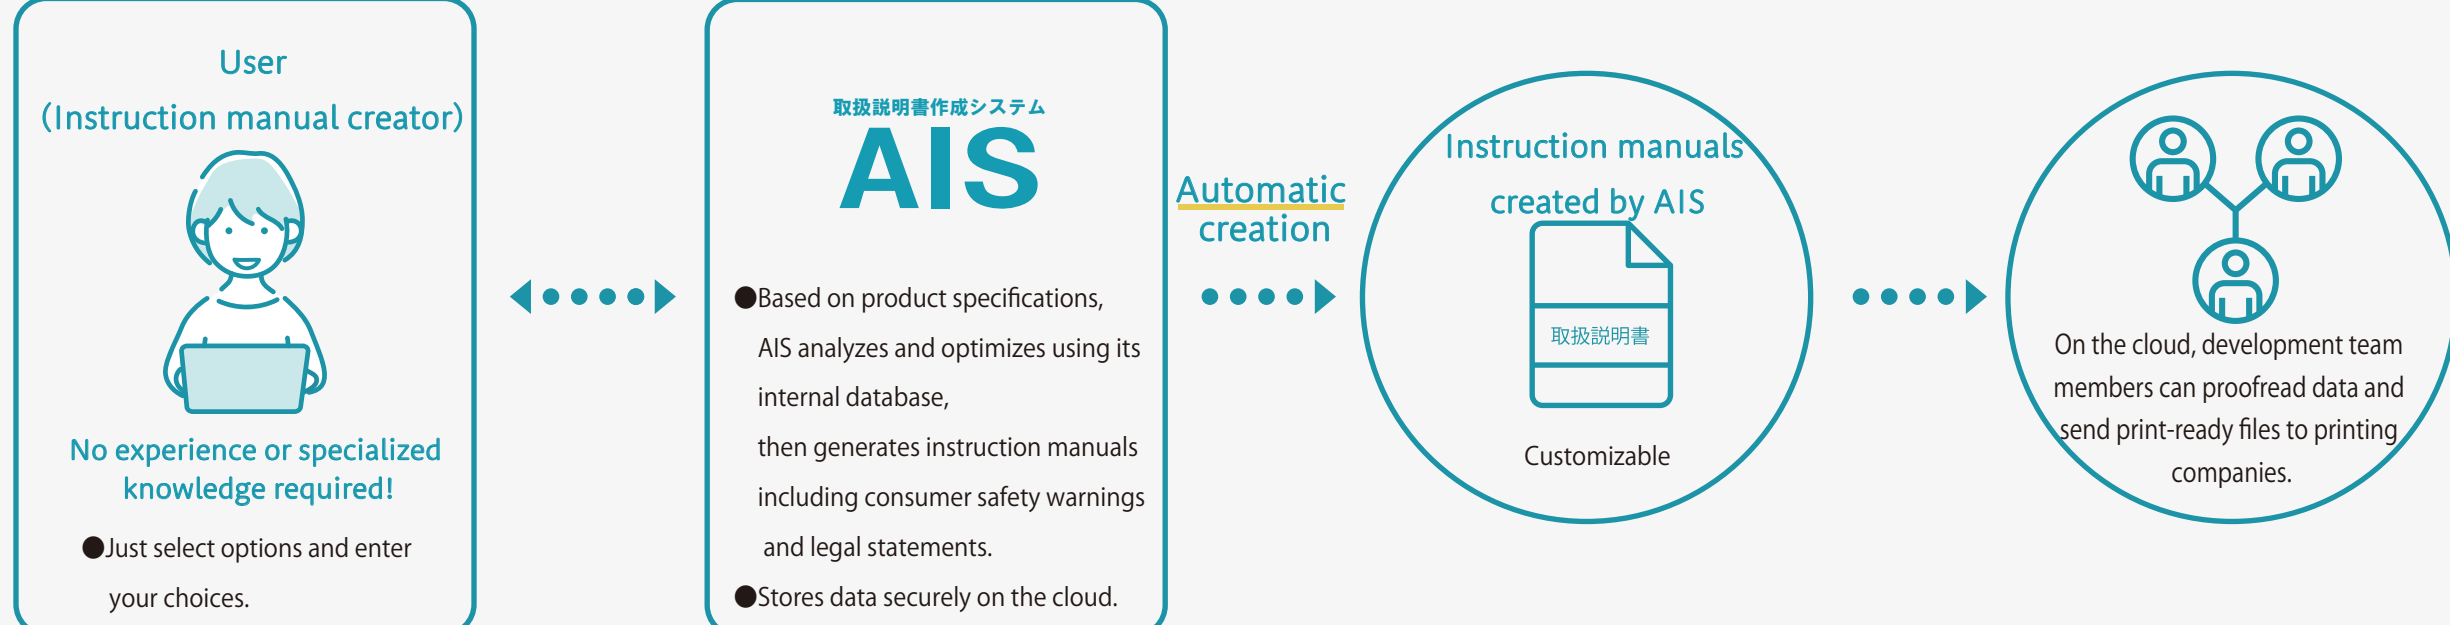

This results in a heavy workload for manufacturer staff.

Solution ! !

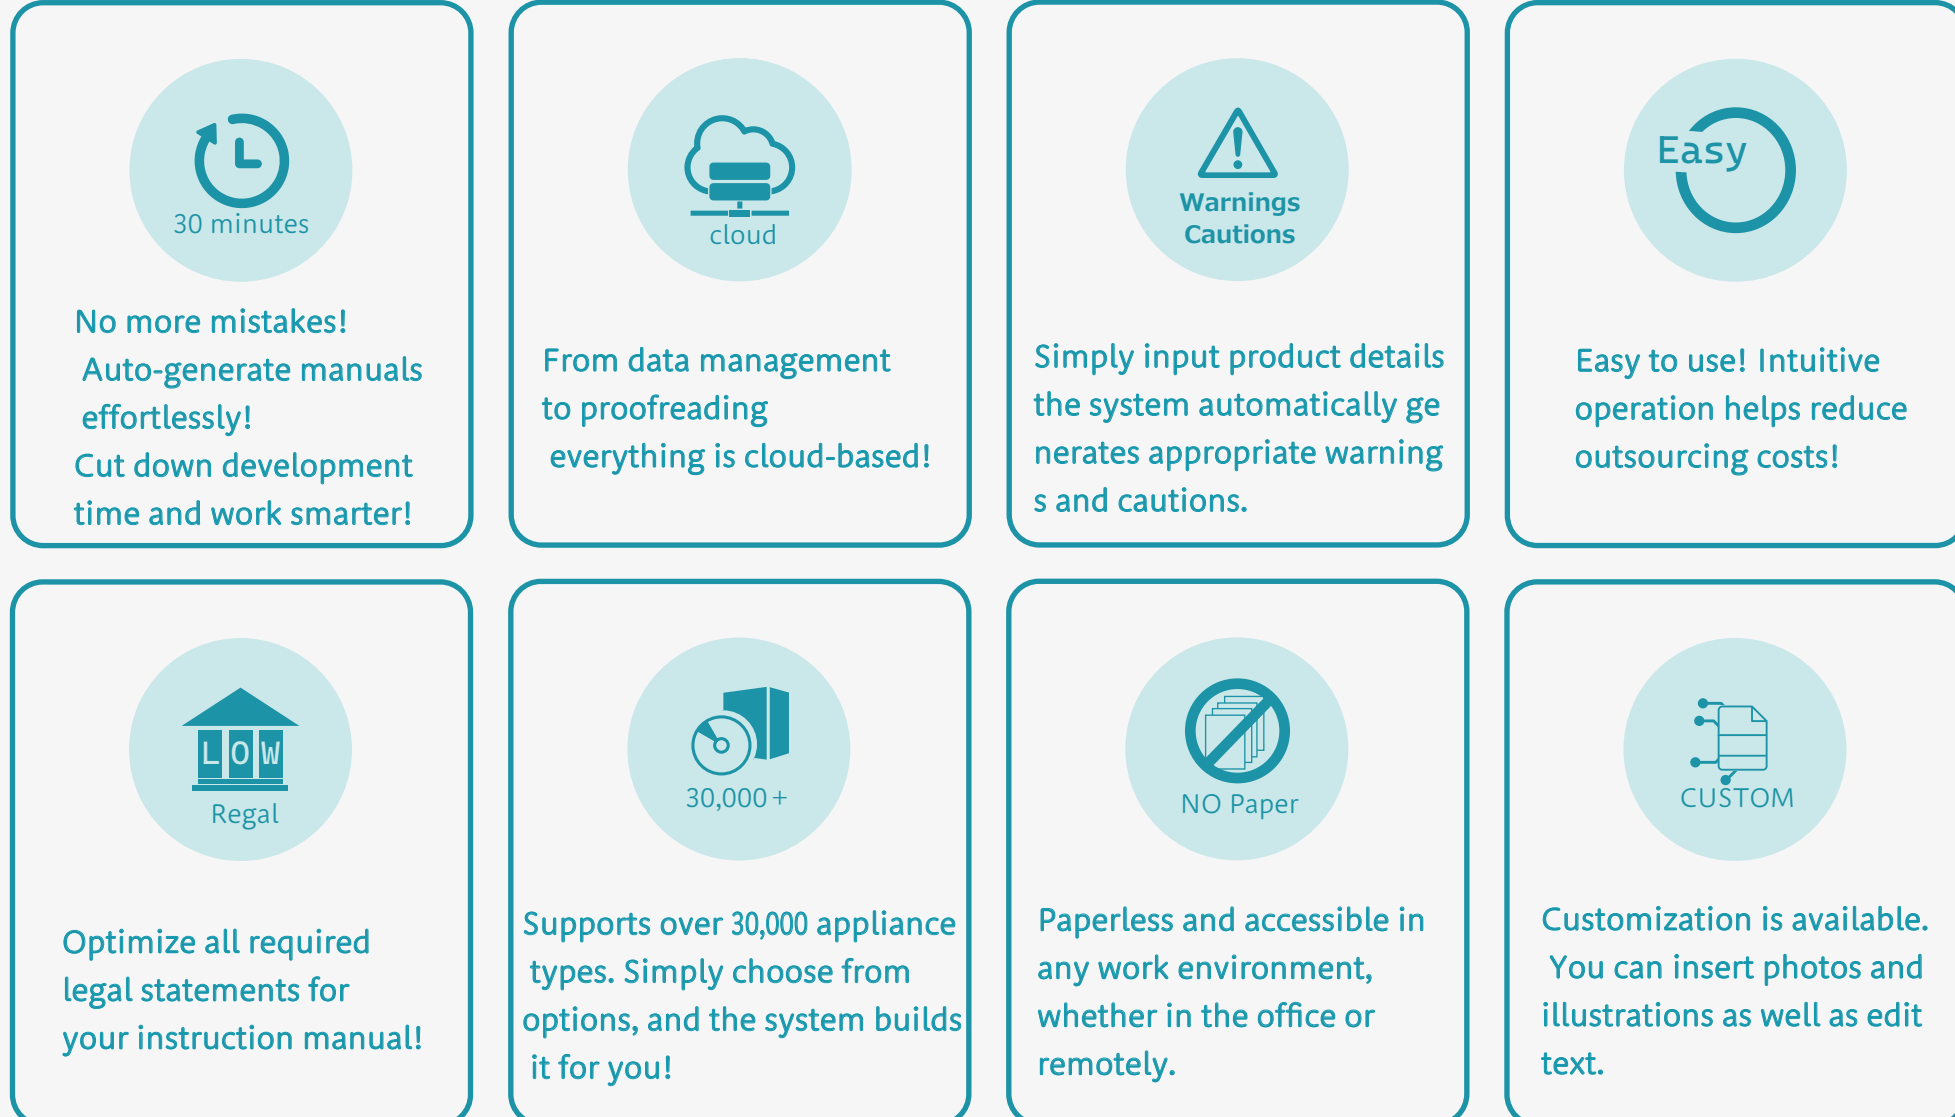

AIS is a cloud-based system. Proofreading among developers, as well as data submission to production staff and factories, can all be easily done online. This eliminates unnecessary tasks and resource waste associated with proofreading, enabling remote work even during spare moments while traveling or on business trips, thus improving operational efficiency.

Without specialized or legal knowledge, anyone can easily create product instruction manuals using **AIS**

The AIS Instruction Manual Creation System is a cloud-based platform designed for home appliance development companies to create instruction manuals online. Even without specialized knowledge of home appliances, anyone can easily create instruction manuals. AIS automatically generates consumer warnings and safety notices tailored to the unique features of each appliance. Moreover, it incorporates a comprehensive database of relevant laws—including the PL Law, Electrical Safety Law, Household Goods Quality Labeling Law, Act against Unjustifiable Premiums and Misleading Representations, Pharmaceutical Affairs Law, Recycling Law, Measurement Act, and Fluorocarbon Emission Control Law—and automatically applies the appropriate legal statements based on the product.

8 Reasons Why AIS Is the Preferred Choice

AIS Operation Screen

1. Select a category from the database within AIS.

AIS includes a comprehensive database with appliance categories (including cooking, seasonal, cleaning, large appliances, lighting, exercise, beauty and grooming, medical devices, and others) enabling support for more than 30,000 products.

2. Select options and enter the brand, product name, specifications, and manufacturer information.

Option Selection Screen (Feature Selection)

Input Screen (Brand / Product Name / Specifications / Company Information)

3. AIS automatically generates and optimizes legal statements and consumer warnings tailored to the product for page display. The generated data can also be edited as needed.

AIS Automatic Generation Process Screen

Edit Screen (Text / Images / Positioning / Scaling Available)

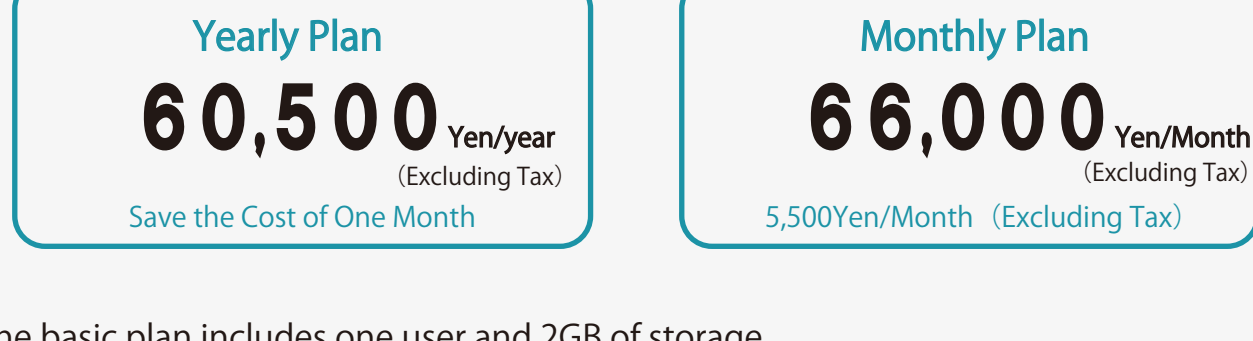

AIS has a comprehensive database of various laws, including the Product Liability Law, Electrical Safety Act, Household Goods Quality Labeling Act, Act against Unjustifiable Premiums and Misleading Representations, Pharmaceutical Affairs Law, Recycling Law, Measurement Act, and the Fluorocarbon Emission Control Act. Additionally, it can generate anticipated consumer warning and caution statements tailored to over 30,000 types of appliances.

AIS Pricing Plans

The AIS Instruction Manual Creation System is a cloud-based platform that can be accessed from anywhere with an internet connection. No server setup is required, allowing for a quick and cost-effective start. Annual and monthly payment plans are available.

Flexible Payment Plans

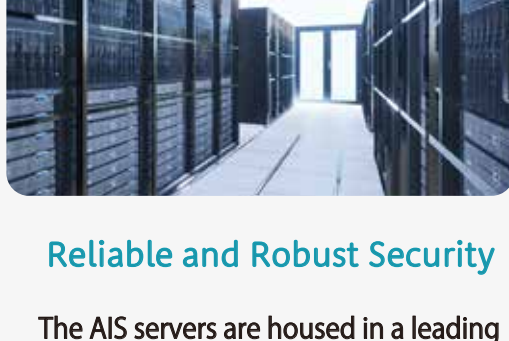

The basic plan includes one user and 2GB of storage. Additional options are available at the following costs:
Additional Users: ¥220 per user/month (excluding tax)
Additional Storage:
• 2GB for ¥250/month (excluding tax)
• 8GB for ¥600/month (excluding tax)
A one-time initial system setup fee of ¥15,000 (excluding tax) will be charged at the time of first use.

Comprehensive Support and Robust Security Features of AIS

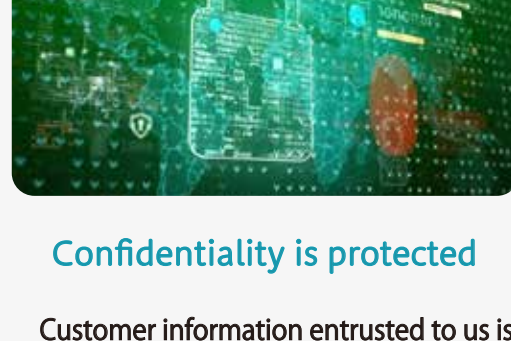

Prompt and Courteous Support

Our dedicated AIS support staff will assist you from system implementation to daily operation. If you have any questions, please feel free to contact us.

Reliable and Robust Security

The AIS servers are housed in a leading domestic data center known for its disaster resilience, featuring robust and thorough security measures.

Confidentiality is protected

Customer information entrusted to us is carefully managed, and strict measures are in place to prevent any external leakage of created data.
